SIDUN / PRODUCT INFORMATION SHEET

SIDUN 108 Neutral Sanitary Silicone

Catalogue SKU: SIDUN-108 | Version 1.0 | English | 21 November 2026

SIDUN 108 is a sanitary silicone for sealing compatible kitchen and bathroom perimeter joints. Evaluate it at the edge of the actual fixture and surrounding finish, including the cleaning routine and water exposure expected in service.

Key features

Sanitary silicone for kitchen and bath joints • Cartridge-applied bead • Clear and porcelain-white catalogue finishes

Typical applications

Basin-to-counter perimeter joints • Compatible bath-to-tile junctions • Kitchen splashback-to-worktop seams

Substrates and compatibility

Test adhesion and appearance on the actual porcelain, glazed tile or worktop finish. Acrylic, coated finishes and natural stone need individual compatibility and staining checks.

Packaging

The 2025 catalogue lists 310 mL cartridges, 24 per carton, in clear and porcelain white. The original SIDUN catalogue showed other pack sizes. Confirm the current version and colour.

Application guidance

Prepare — remove old sealant and residue, then clean and dry the contact faces. Apply — form a continuous tooled bead at the junction and check the corners and returns for gaps. Check — follow the documented cure conditions before water exposure and inspect the sample after representative cleaning.

Planning a trial

Share the fixture material, surrounding surface, joint dimensions and anticipated cleaning products. Describe any standing water or immersion separately when asking about suitability.

Technical data and safety information

Request the selected revision for cure chemistry, water exposure and any applicable sanitary-test scope.

This sheet summarizes product identity and selection guidance. Request the applicable technical data sheet and safety data sheet for the selected model, packaging version and market. Confirm current packaging and availability before ordering.
