SIDUN 2100 Neutral Silicone Sealant for Assembly

Catalogue SKU SIDUN-2100 | Product information v1.0 | 21 November 2026

Product overview

A single-component neutral silicone sealant for assembly joints involving glass, metal and compatible stone. The catalogue describes its use in architectural and industrial assembly, with adhesion and compatibility assessed on the specific substrates.

Key features

- Single-component neutral silicone
- Assembly joints on compatible glass, metal and stone
- Review adhesion of the actual coating

Applications and selection

A non-load-bearing seam beside a metal profile.

- Name the coated surfaces and the joint purpose
- Compare the joint on representative samples
- Request project-specific evidence for engineered applications

Catalogue pack information
